

Intermediate combined physico-chemical kit

HYDROKIT HK2000

A mid range water quality analysis kit including 2 separate pocket meters for pH and conductivity from the Hydrolite range, and a quality multi-parameter photometer (HT1000) for a broad range of chemical tests and turbidity. The waterproof carry case also contains reagent for ammonia, chlorine (residual and total), nitrate and also calibration buffers for the pocket meters.

- Accurate chemical testing capability
- Digital turbidity reading
- Includes the HydroLite pH and conductivity (see page 26)
- Incorporates the HT1000 multi-parameter photometer (see page)
- Single, hard shelled carry case for ease of carriage
- Includes reagents for standard water quality tests

DESCRIPTION	PRODUCT CODE
HK2000	WT13-600

TECHNICAL SPECIFICATION

Case	<ul style="list-style-type: none"> • A single hard shell waterproof case • Soft grip handle for easy carriage
Digital Testing	<ul style="list-style-type: none"> • Pocket pH/temperature meter • Pocket EC/TDS meter • Digital multiparameter photometer • Digital turbidity capability
Reagents	<ul style="list-style-type: none"> • Tablet reagents for testing of <ul style="list-style-type: none"> • Ammonia • Residual chlorine • Total chlorine • Nitrate • Nitrite
Dimensions mm	• 470 x 365 x 190
Weight Kg	• 6

Additional reagents and accessories for further chemical tests available – see pages 64- 68.
